HEGUEL
JOSEPH

SOFTWARE ENGINEER

Software engineer, specializing in full stack development, Scrum Master, SEO and digital marketing. I hold a Bac+5 in computer science, with recognized certifications, including CCNA V7 (Cisco) and various LinkedIn Learning certifications. Motivated, responsible and able to work in a team or independently, I'm committed to keeping my skills up to date through ongoing training and active contribution to each project.

EXPERIENCES

PROGRAMMER | MAR 2024 - DEC 2024
E-management

- Updated the website interface to make it more intuitive and user-friendly.
- Enabled website users to install it as an application on their phones.
- Collaborated with other external programmers to solve crucial problems.

WEBSITE TESTER | DEC 2023-FEV 2024
Association d'Acteurs de Développement (AAD)

- I tested the website's interfaces on different devices to ensure that users had a user-friendly experience when interacting with the website.
- I tested the different functionalities of the website to ensure that customer requirements were met.
- I tested the website's SEO performance

WEBSITE PROGRAMMER | FEV 2023-MAR 2023
Ecole professionnelle de la nouvelle génération de Limbé

- Creation of a website for the EPRONGE-H vocational school, enabling new students to register online.
- The website allows school staff to view student registrations, validate registrations, create promotions and create archives.

SOFTWARE TESTER | MAY 2023-JUL 2023
RsoftSysem

- I wrote the test cases for the whole software so that any bugs found could be corrected.
- I worked on the internationalization of the software so that it would be in three different languages: English, French and Creole.
- I also took part in writing the user guide for this software.
